## NOTES:

The ALLER-TEK Gluten assay utilizes ELISA techniques and is designed for the measurement of cereal gluten at low levels, nominally within a range of 5-80 PPM, in raw materials and finished food products; it detects the gliadin and glutenin fractions of gluten.

For the quantitation of barley gluten, a standard curve derived from barley proteins is used.

The ALLER-TEK Gluten ELISA has been validated and certified with license no. 081202 as a Performance Tested Method by the AOAC Research Institute.
